ADOBE PHOTOSHOP (DESKTOP)

TURN A SKETCH PHOTO INTO CLEAN LINE ART

ENHANCE MY ART · STORYBOARD SERIES · GLASSWORKS LLC

VALUE FOR YOU ★★★★★

Desktop on the-box · GPU-accelerated

6 STEPS, ~5 MINUTES

1 Open the photo

File > Open

or drag onto Ps

2 Square it up

Perspective

Crop tool (under C)

click the 4 paper corners

3 White paper, black ink

Image > Adjustments > Levels (Ctrl+L)

drag right slider left until paper is white

4 Grab just the lines

Select > Color Range > Shadows

then Ctrl+J = lines on own layer

5 Lines on top

blend mode **Multiply**

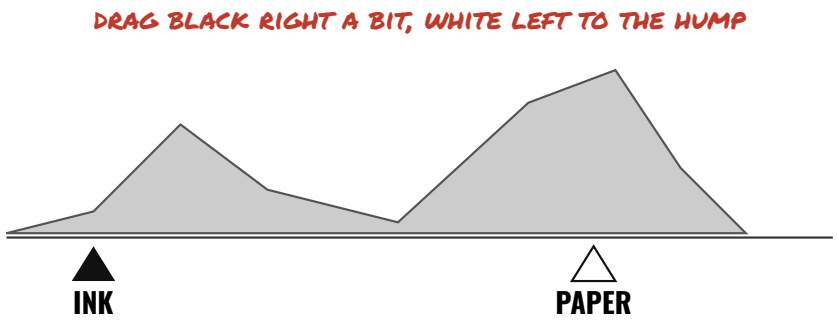

color goes UNDER the lines

6 Save the master

File > Save As > .PSD

into V:\ your art folder

LEVELS: THE 2-SLIDER TRICK

WHICH CLEANUP?

SKETCH IS…	USE
Pencil, grey, soft	Levels, then Filter > Camera Raw Filter Texture/Clarity +
Ink, crisp	Image > Adjustments > Threshold (pure B/W)
Stained-glass design	Threshold, then send to Illustrator (guide 03)
Smudges / eraser marks	Remove Tool (J group): paint over them
Bent / wavy paper	Edit > Puppet Warp lightly, or reshoot flat

FIREFLY INSIDE PHOTOSHOP: FIX + EXTEND

ENHANCE MY ART · STORYBOARD SERIES · GLASSWORKS LLC

VALUE FOR YOU ★★★★★

Desktop on the-box · GPU-accelerated

THE AI BUTTONS (most show up on the floating Contextual Task Bar)

GENERATIVE FILL

select area → **Generative Fill** → prompt

Fix one hand, add a prop, swap a background. Small areas = better.

GENERATIVE EXPAND

Crop tool → drag past edge → **Generate**

Widen a square sketch to 16:9 for a storyboard.

REMOVE TOOL

Remove Tool (J) → paint

Erase smudges, stray lines, tape on the scan.

HARMONIZE

select a pasted layer → **Harmonize**

Matches light + color of a pasted character to the scene.

GENERATIVE UPSCALE

Image > Generative Upscale

Bigger print files. Pick the **Firefly** upscaler option.

GENERATE IMAGE / BACKGROUND

Contextual Task Bar on a blank or cut-out layer

Fast backdrops behind your drawn characters.

WHICH BUTTON FOR WHICH JOB?

YOUR JOB	BUTTON	AI?	TIP
Fix a wonky hand or face	Generative Fill	yes	select a bit MORE than the hand; prompt: "relaxed open hand"
Storyboard needs 16:9	Generative Expand	yes	expand in 2 small steps, not 1 huge one
Pencil smudges, tape, dust	Remove Tool	light	short strokes; zoom in to 100%
Character pasted onto a photo background	Harmonize	yes	run after the character is cut out cleanly
Print a big poster from a small scan	Generative Upscale	yes	upscale last, after all edits
Erase a stray line on your ink	Eraser (E) / mask	no	faster + 100% your hand

SAME ETHICAL SWITCH HERE

Generative Fill and Upscale have a **model** menu. Keep it on the Firefly model. Partner models (e.g. Gemini / Nano Banana) are listed too: skip them for guilt-free pieces.

RTX 3070 SETUP (once)

Edit > Preferences > Performance → tick **Use Graphics Processor**; give Photoshop 70% RAM. Generative AI runs in the cloud, everything else uses your GPU.

AI NEVER TOUCHES YOUR LINES

Lock the lines layer (padlock icon) before Generative Fill. Generate on a new layer under it.

COLOR OVER YOUR LINES: THE LAYER STACK

ENHANCE MY ART · STORYBOARD SERIES · GLASSWORKS LLC

VALUE FOR YOU ★★★★★

Desktop on the-box · GPU-accelerated

BUILD THIS STACK (top to bottom)

LINES (locked)	Multiply • your ink
LIGHTS	Screen / Overlay
SHADOWS	Multiply, 40-60%
FLATS	solid colors per area
BACKGROUND / AI	Firefly fills go here

FAST COLORING LOOP

1. **Flats**
   Magic Wand (W) on lines layer, Sample All Layers off
   fill each area on FLATS
2. **Shadows**
   new layer, Clipping Mask (Alt-click between layers)
   one shadow color, Multiply
3. **Lights**
   same, Screen
   rim light = instant 80s action
4. **Background**
   Generate Background, or your own painting
   on the bottom layer
5. **Unify**
   Harmonize or a Color Lookup adjustment
   one mood for the whole frame

STORYBOARD FRAMES, EXPORT + SHORTCUTS

ENHANCE MY ART · STORYBOARD SERIES · GLASSWORKS LLC

VALUE FOR YOU ★★★★★

Desktop on the-box · GPU-accelerated

STORYBOARD SHEET IN 4 MOVES

1. **New doc 1920 x 1080**
   File > New > Film & Video > HDTV 1080p
   or 16:9 any size

2. **One artboard per shot**
   Artboard tool (V group) → + arrows
   name them SH01, SH02…

3. **Drop sketch + art**
   drag from Firefly / Lightroom
   lines layer on top

4. **Export all shots**
   File > Export > Artboards to Files
   PNG → Boards / video editor

12 SHORTCUTS WORTH LEARNING

KEY	DOES
B / E	brush / eraser
[ ]	brush smaller / bigger
Ctrl+J	copy to new layer
Ctrl+L	Levels
Ctrl+T	transform
Ctrl+Z	undo (many times)
Space drag	pan
Alt+scroll	zoom
X / D	swap / reset colors
Ctrl+Shift+N	new layer
Ctrl+Shift+Alt+E	merge visible to new layer
Ctrl+Alt+Shift+W	Export As

EXPORT FOR…

WHERE IT GOES	SETTINGS
Firefly reference	JPG or PNG, 2000+ px long side
Print / glass pattern	TIFF or PDF, 300 ppi at real size
Social / Express	PNG, 1080 px square or 1080x1350
Video / animatic	PNG, 1920x1080, one per shot

CONTENT CREDENTIALS

Window > Content Credentials → turn on before you export. It records that you drew it and which AI steps you used. Name: Ely Poprafsky (guide 10).
