3D POSE REFERENCE FOR HARD STORYBOARD ANGLES

STORYBOARD SERIES

VALUE FOR YOU ★★☆☆☆

Web · free 3D characters + motion library

CAN'T DRAW THAT FLYING KICK FROM BELOW? POSE A 3D DUMMY

1 Pick a body

Characters tab

any stock character

2 Find a move

Animations →

search kick, punch, fall

2,000+ moves

3 Tweak

sliders: speed, arm space, overdrive

exaggerate it

4 Freeze a frame

scrub the timeline

5 Orbit the camera

drag the view

low angle = heroic

6 Screenshot

Win+Shift+S

draw over it by hand

GOOD SEARCH WORDS FOR AN 80s ACTION SHOW

SCENE	SEARCH
Fight	punch, kick, hook, uppercut, roundhouse
Gunplay	rifle aim, pistol, reload, take cover
Getting hit	hit reaction, knocked down, dying
Cool walk	swagger, strut, slow walk
Bandfest	guitar playing, dancing, headbang, cheering

HEADS UP

Mixamo is free but in maintenance mode (no new features, occasional outages). Humanoid bodies only: two arms, two legs, one head. Not for pets or monsters.

STILL YOUR ART

The 3D dummy is a **reference**, like a mirror. You draw the frame; Firefly finishes it.

RIG YOUR OWN CHARACTER + SEND TO BLENDER

STORYBOARD SERIES

VALUE FOR YOU ★★☆☆☆

Web · free 3D characters + motion library

UPLOAD → RIG → ANIMATE → DOWNLOAD

1 Upload

Upload Character: FBX / OBJ / ZIP

T-pose or A-pose, facing you

2 Place markers

chin, wrists, elbows, knees, groin

drag the colored circles

3 Skeleton

Standard (65 bones)

fingers included

4 Apply a move

pick an animation

check for arm clipping

5 Download

FBX Binary • With Skin • 30 fps

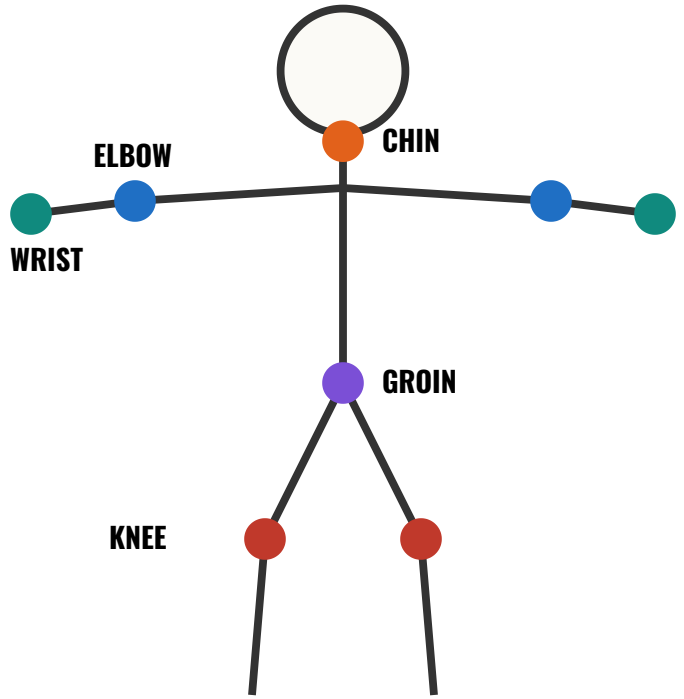

Keyframe Reduction: none

6 Blender

File > Import > FBX

your Blender tools pick it up

AUTO-RIGGER MARKERS

WHERE DO 3D MODELS COME FROM?

Mixamo's own characters, a model you make in Blender, or one built from your sketches. Mixamo doesn't make models from drawings.

"IN PLACE" CHECKBOX

Tick it for walks and runs so the character stays put: easier to loop in Blender or a game engine.

MARKERS WRONG = SPAGHETTI ARMS

If arms twist after rigging, go back and nudge the wrist + elbow markers onto the joint centers, then re-rig.
